

August 31st Public Meeting on School Overcrowding in Foster City

The San Mateo - Foster City School District is facing projected enrollments that will exceed the current capacity of its three elementary schools in Foster City. The District's preferred solution is to build a fourth school on land the District would acquire from the City. Four proposed sites are shown on the map at right.

The City Council seeks public input on how best to address the school overcrowding issue, including the District's request to acquire City property for a fourth school site, before making this important decision.

Public Meeting

Attend the meeting and offer your comments:
