Candidate Statement  
Jon Froomin

I have been affiliated with Foster City for 47 years. I have 36 years experience working with local governments, 25 of them have been as an employee of the Foster City Police Department.

I am a product of Foster City schools and Foster City Troop 175, Little League and AYSO and received the City of Foster City Honors Award. I'm a past president of the Foster City Lions Club and have been recognized by Special Olympics Northern California and Special Olympics Southern California. I am proud of my reputation as a leader and collaborator.

I want to work with council members to welcome back our community to their Council Chambers and to participate in a respectful governance process. Two important issues facing our community are housing and traffic. These issues are regional and require active representation and advocacy at county and state levels. While considering the impacts of proposed projects and the ramifications of our decisions, we need to use available resources to influence Sacramento to restore local control. All communities are not the same, therefore a single solution will not work.

I believe my knowledge base, skills and character will help our City as we together move forward and reunify our community.
