

Stacy Jimenez Candidate Statement

As a long term resident of Foster City I am committed to a city council that values civil discourse, transparency, and public input. I believe in protecting our parks and open spaces from development and prioritizing the health of our waterways. I will fight to ensure our schools receive their fair share of school funding sources and that our students have safe and dynamic learning spaces. As an attorney, I am well versed in the state's building mandates and I feel it is imperative that any housing that is built must enhance our city without overburdening resources and increasing traffic. I have spent the last two years as a member of our city's Parks and Recreation Advisory Committee and it is through this work that I have gained a valuable insider's view of our city. I believe in harnessing the creativity of our residents in finding unique solutions to city issues, particularly as they relate to the levee, building of a new recreation center, and budget deficit. We must work together to keep Foster City the "jewel of the peninsula." More information about me and my core values can be found at [www.stacyforcouncil.com](http://www.stacyforcouncil.com).
