Subject: Traffic Review Committee Agenda

Greetings,

I would like my request from January 30, 2020 to be reviewed again at your scheduled meeting on January 27, 2022. My request was for all ways stops at the intersection of Polynesia and Comet Drives. I attended the 1/30/20 meeting and my request was Item #4 on the agenda and was discussed. There was no follow-up on subsequent meetings and other meetings were cancelled due to the pandemic. I resubmitted my request for your 11/18/2021 meeting and it was part of the written record but not verbally read. Attached is my previous email to the committee to refresh your memory. My request is to prevent an accident waiting to happen to pedestrians and vehicles at this school crossing near Brewer Island Elementary School. I would appreciate feedback to my request.

Best regards,
Norman Owyang

Subject: Support for 4-way stop sign at Comet and Polynesia

Hi Traffic Review Committee members,

It would help tremendously with safety if there is a 4-way stop sign at the Comet and Polynesia intersection. We walk by the Comet and Polynesia stop sign every day on the way to walk my daughter to school at Brewer Island and it is a very scary intersection. Because the sign do not apply to the Polynesia way, we are always not sure if the cars are going to stop for us to cross. We usually have her 3yo brother with us and it's nerve wrecking to make sure they are all cross the street at the same place so I can try to make eye contact with the drivers to stop for us. At times where we are not on foot, it is difficult to see around the cars parked at the corner of the streets before making a left turn onto Polynesia from Comet. We've notice that most local traffic does slow down because you never know if pedestrian or car or bike is going to fly out the corner, however it would make it safer if there's an official stop sign.

Thank you very much for your consideration.

Karen Li

Subject: TRC Comment

Hi Lori,

The following comment was sent to me and they spoke with me on the phone. They would like the following comment presented to the committee. Please include it on the written public comments section.

“Thanks for letting me know about the meeting. Yes I am interested in the topic but unfortunately I will not be able to attend the meeting due to other commitment. However, I would like to express my objection to a "red curb" along Leo park. I feel that this is unnecessary, and, if implemented, would greatly affect my residence at 611 Leo Drive. I do not believe that parking is the cause of any traffic problem in this block. Most of the time, my car is the only one that parked there and that restricting parking will not solve anything. This is my opinion and please convey this to the committee. Thanks.”

John Kwan – Resident at 611 Leo Drive
