

# **COMPOST BIN** **INCENTIVE PROGRAM**

## **Available to Foster City Residents!**

Composting is nature's way of recycling fruit and vegetable scraps and yard trimmings. Compost provides valuable nutrients for your garden soil and helps retain moisture, which saves water, prevents erosion, and loosens compacted soils for better drainage.

Foster City residents are eligible for a \$40 incentive from the City toward the purchase of a compost bin, worm compost bin, or compost tumbler. Foster City residents who attend a composting workshop sponsored by San Mateo County automatically qualify.

The incentive is only redeemable through an order with Triformis Corporation. San Mateo County is also offering discounted rates for compost bins purchased through Triformis. The Foster City incentive may be combined with their compost programs. To place an order, Foster City residents need to call Triformis Corporation at (310) 641-6767.

Complete program guidelines are available at [www.fostercity.org](http://www.fostercity.org) or at City Hall (610 Foster City Boulevard, Foster City).
